

## **Cessna Caravan 208 & 208B STC**

### **Pilot and Copilot Lower Door Panels**

The Pilot and Copilot Lower Door Panel is an STC project that will remove the existing lower door panel installed on the pilot and co-pilot doors and install the new ASIC lower door panels. For installations on newer aircraft there will be no change in fit, form, or function. On aircraft built prior to 2008, the installation of the new lower door panel will add a map pocket with the ability to stow 10-15 lbs. of equipment. Different color options are available for the new lower door panels.
